from its independence in 1810 until the economic crisis of 2001 argentina has been seen in the national and international collective imaginary as a modern country with a powerful economic system a massive european immigrant population an especially strong middle class and an almost nonexistent indigenous culture in some ways the early history of argentina strongly resembles that of the united states with its march to the prairies and frontier ideology the image of the cowboy as a national symbol equivalent to the argentine gaucho the importance of the immigrant population and the advanced and liberal ideas of the founding fathers but did argentine history truly follow a linear path toward modernization how did photography help shape or deconstruct notions associated with argentina photography in argentina examines the complexities of this country's history stressing the heterogeneity of its realities and especially the power of constructed photographic images that is the practice of altering reality for artistic expression an important vein in argentine photography influential specialists from argentina have
